EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin Barner on 10/12/2004.

The application has been amended as follows:

- **Claim 1, line 5:** " is satisfied where d represents the depth of the recessed portions of the irregularity pattern and t represents the thickness of the magnetic layer formed on the recess portions, and the magnetic layer formed on the protruding portion of the irregularity pattern and the magnetic layer formed on the recessed portions of the irregularity pattern are connected with each other. " **has been deleted** and -- is satisfied where d represents the depth of the recessed portions of the irregularity pattern and t represents the thickness of the magnetic layer formed on the recess portions, the magnetic layer formed on the protruding portions of the irregularity pattern and the magnetic layer formed on the recessed portions of the irregularity pattern are connected with each other; and wherein the formula $0.01 \leq \delta / t < 0.5$ is satisfied and wherein further, δ represents the thickness of the magnetic layer of the side wall connecting the magnetic layer on the protruding portions and the magnetic layer on the recessed portions. -- **has been inserted therefor.**

- **Claim 10, line 5:** "represented by \underline{d} and a thickness of the magnetic layer formed on the recessed portions is represented by \underline{t} and $-0.004 \leq (t - d)/d \leq 0.1$. " **has been deleted** and -- represented by d and a thickness of the magnetic layer formed on the recessed portions is represented by t and $-0.004 \leq (t - d)/d \leq 0.1$; and wherein said magnetic layer comprises a connecting portion connecting the magnetic layer formed on the protruding portions of the irregularity pattern and the magnetic layer formed on the recessed portions of the irregularity pattern and wherein further, $0.01 \leq \delta / t < 0.5$, wherein δ represents the thickness of the connecting portion. -- **has been inserted therefor.**
- **Claims 8, and 11-13 have been cancelled**

Reasons For Allowance

2. The following is an examiner's statement of reasons for allowance: The closest prior art to that of the instant invention are: 1) US2001/0028964 to Nagao; and 2) US6347016 to Ishida. While these references teach many of the applicants claimed limitations, they fail to teach or suggest the δ / t limitation required by all of the instant claims. Further, there is no teaching in the prior art that would motivate one of ordinary skill to modify the teachings of Nagao or Ishida so as to arrive at the instantly claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
